STONES FOR ZODIAC SIGNS

The fact that the influence of stones on health and on the fate of a person is determined by the position of the planets and the signs of the zodiac was discovered in ancient times. Astrologers have found that the most favorable for a person are those stones that are associated with the sign of the Zodiac under which he was born. Tables of correspondence of stones to the signs of the zodiac were compiled in the Middle Ages. Based on these lists, these or those stones of the signs of the zodiac become for their owners a talisman, amulet and talisman for life.

Talismans made from natural stones, selected in accordance with the sign of the Zodiac, endow a person with special powers, help develop qualities that bring success, happiness, attractiveness and wealth. Gems are designed to protect their owner from all sorts of negative influences - the evil eye, damage, disease, increasing his ability to catch the first signs of impending danger.

The stones are also able to have a healing effect on their owners. The constant wearing by a person of natural stones corresponding to his zodiac sign helps to strengthen the immune system and replenish vitality.

Knowing which stones correspond to your zodiac sign, you can choose your talisman that will protect you from negative energy and give you good luck throughout your life.
